COSTUMDECK

<What is it?>

<COSTUMDECK is a DIY
cyberdeck computer
powered by raspberry pi5
and an esp32 installed . It
designed to let you code a
nd build simple hardware
projects on the go>

</.end>

<Why i build it>

<I have always loved codi
and making hardware
projects ,but i wanted a
way to do it anywhere
without needing a
desktop.So i build this
cyberdeck to allow me to
code and build everywhere

</.end>
